

ALCOHOL AND DIABETES

Drinking alcohol may be OK if you can answer YES to the following:

1. My blood sugar is under good control
2. I know how to avoid (prevent) and treat low blood sugar
3. My doctor or the diabetes clinic says it is OK to drink alcohol

YES NO

1 DRINK =

5 OZ. WINE

OR

1½ OZ. ALCOHOL

OR

12 OZ. BEER

How much can I drink?

One drink a day for men and women.
Two drinks a day for men (only men) may also be OK.

How to drink alcohol:

- Drink with a meal or with foods high in carbohydrate
- Drink slowly and don't drink alone
- Check your blood sugar often
- Always have a low blood sugar snack handy
- Make sure someone with you knows you have diabetes

If you drink, remember:

Alcohol can cause a sudden drop in blood sugar, especially in type 1 diabetes. There may be no warning. You could even pass out.

Summary:

If you don't drink alcohol now, don't start. No one needs to drink alcohol. If you do drink alcohol, it is always best to drink only a small amount.

Talk to your doctor

or diabetes educator for more information.
